The following is an examiner's statement of reasons for allowance: the claims are allowable over the prior art of record because the prior art fails to show or suggest, either singly or in combination thereof, a four-way adjustable headrest comprising a frame adapted to operatively engage the seat back of a vehicle, a housing adapted to operatively engage a portion of the frame, the housing including at least one aperture disposed along a horizontal axis perpendicular to the frame, a cam assembly disposed within the housing adapted to provide fore and aft adjustment of the housing relative to the frame, the cam assembly including a camshaft extending along the horizontal axis and at least two drum assemblies operatively supported by the camshaft, the cam assembly further including a contact plate extending parallel to the camshaft and adapted to releasably engage the drum assemblies. The camshaft is operatively connected to the contact plate to provide releasable engagement between the contact plate and the drum assemblies, and a control member is adapted to operatively engage the cam assembly and provide for fore/aft and vertical adjustment in response to user input.
